

Austin, Dec. 7 1891.

Charles S. Peirce,

My dear Sir,

I was very much interested in your paper on "Astronomical methods of determining the curvature of space," read before the National Academy of Sciences, and if you distribute any reprints of it, I would be much obliged for a copy.

Yours very sincerely

George Bruce Halsted

Dr. George Bruce Halsted,  
President of the Academy of Science,  
2407 Guadalupe St., Austin, Texas,  
UNITED STATES OF AMERICA.

Dec. 17<sup>th</sup> 1895

Charles S. Peirce,

My dear Sir,

I send you by this mail, care of "The Nation", a copy of my Bolyai's Science Absolute of Space entirely rewritten.

I have been so fortunate as to be able to announce important additions to the knowledge of the history of these most interesting researches and the lives of the two Bolyais.

With high regard  
Yours always sincerely  
George Bruce Halsted.
