

July 6 '72

Dear Sir

In my notes to  
"measurement of terrestrial  
magnetism" there is a refer-  
ence to an appendix on the  
"adjustment of the theodolite".  
This appendix I was not able  
to furnish sooner, but would  
now submit it with the request  
that it may be sent to the prin-  
ter, together with a leaf con-  
taining an example of the mea-  
sure of the magnetic moment of  
a magnet in relation to changes of  
temperature. Proof sheets are, of  
course, desired.

Yours respectfully

Chas. A. Smith

Chas. S. Peirce Esq
