VB36#2

U.S. Coast Survey Office

Washington. Sept. 10 1872

Dear Sir

A friend of mine who spent the summer with a gentleman belonging to the Boston yacht club reports a rock in the channel between Thompson's Island and Squantum, bare at low water with a buoy on it — not marked down on our chart — he made a mark on the accompanying chart and it would be well to have this examined & if facts are as stated to have it marked on our chart

Chas. P. Perry Acting
Surveying Officer

Yours resp^s
Chas. P. Perry
