**À la recherche des catégories sémantiques oubliées. (French) [In search of forgotten semantical categories]**

*Analyse catégorielle et logique*, 35–51, *Travaux Log.*, 10, Univ. Neuchâtel, Neuchâtel, 1996.

The goal of this paper is to show the value of the work of S. Leśniewski for defining and formalizing logical constants in different categorial grammars. The paper provides a methodological framework according to Leśniewski's ideas that can be used to develop languages containing variables of the highest order, while enabling the definition of all constants of each category. The paper also deals with some problems posed by this generosity.

A sound knowledge of categorial grammar and of Leśniewski's approach is required to obtain maximum benefit from this paper.
