

B71 Nov 22

Dear Sir

I enclose something, I
would like to have inserted
in my method for the photo.
just before the words "If in-
stead of an equatorially
mounted telescope".

The tilt of the photographic
plate comes out wonderfully
well & that is a very delicate
test of the capacity of the mea-
surements to support elabo-
rate computation

I shall leave here Monday PM
& arrive in Washington before
Sunday.

Yours very truly

Prof. J. E. Hilgund

Washington -

Dear Sir,

I enclose something, I would like to have inserted in my method for the photo just before the words "If instead of an equatorially mounted telescope." The tilt of the photographic plate comes out wonderfully well + that is a very delicate test of the capacity of the measurements to support elaborate computation. I shall leave here Monday PM + arrive in Washington before Sunday.

Yours very truly,
C. S. Peirce
